EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randy Tung on 2/27/08.

The application has been amended (based on the after final amendments filed 12/5/06 which have now been entered) as follows:

- In line 2 from the bottom of claim 15 the phrase "to avoid an ABS responsive that" has been changed to --to avoid an ABS response that--;
 - In the last line of claim 18 the phrase "responses." has been changed to --responses to avoid an ABS response that may excite a vehicle natural vibration frequency.--;
 - In the last two lines of claim 21 the phrase "natural vehicle frequencies" has been changed to --natural vibration frequencies of the vehicle--.
2. The following is an examiner's statement of reasons for allowance: While Lin et al. disclose the limitation of storing natural frequency values, the reference fails to correlate the stored ABS responses to the natural vibration frequencies of the vehicle and then delay, accelerate, or alter the ABS response to avoid excitation of one of the natural vibration frequencies. Accordingly, independent

claims 1, 8, 15, and 18 are allowed. The remaining claims are allowable due to their dependency from one of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melody M. Burch whose telephone number is 571-272-7114. The examiner can normally be reached on Monday-Friday (6:30 AM-3:00 PM).
